

18 VDC Power Supply

Model: 124-0

Phason's 18 VDC power supplies are designed to provide power for DC actuators. The 18 VDC power supplies will position 36 VDC actuators more slowly and accurately, but with less thrust.

Model **124-0** comes with +18 and -18 VDC fused outputs and a Snubber Filter. The Snubber absorbs the noise caused by the load switching on and off and helps extend the life of the actuator and control.

Features

- Easy installation
- Snubber filter
- Ground plate
- Overload protection fuses
- One +18 VDC and one -18 VDC output
- Rugged enclosure (corrosion resistant, water resistant, and fire retardant)
- CSA approval
- Limited warranty (90 days)

Electrical ratings

- Input 115 VAC, 1 A
- Output 18 VDC, 3 A, 50% duty cycle
- Fuses (2) 5 A, 250 V slow-blow glass
