

Display kit installation guide

This kit is a complete replacement display for your control. Read the instructions before replacing the display.

Removing the old display

Before servicing the control, switch OFF the power at the source.

1. Switch off the power to the control.
2. Remove the cover from the unit.
3. Disconnect the ribbon cable from the socket on the control board.

Installing the new display

1. Remove the new display from the bag.
2. Connect the ribbon cable to the socket on the control board.
3. Switch on the power to the unit and verify it operates properly. If it does not operate properly, check the wiring and ribbon cable connection. If the unit still will not operate properly, contact your dealer.
4. Fasten the cover to the enclosure using the four screws.

- ◇ After installing the new display, you will need to reprogram the control. For more information, read the user manual for your control.
- ◇ If you have your settings stored on a **Saver**, you can easily restore them in seconds. For more information about a Saver for your control, contact your dealer or visit www.phason.ca.
