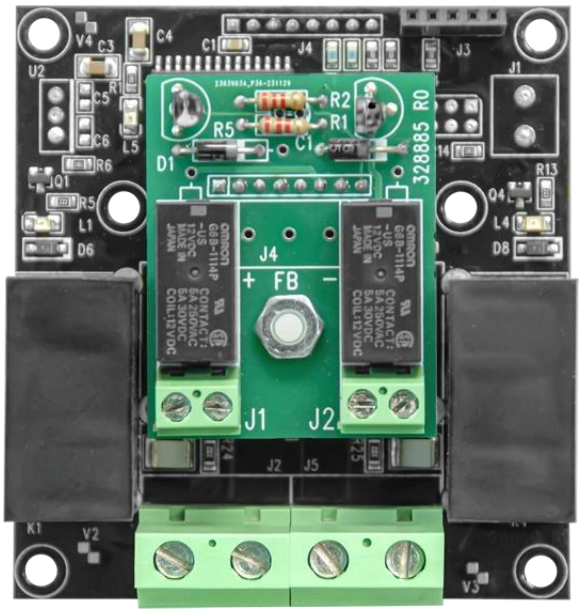
RM-2-3PH

Three-Phase Relay Module

The RM-2-3PH is a Smart Module that has two high-capacity relays and two pilot relays for controlling three-phase motors and equipment. The relays operate as pairs, with one high-capacity and one pilot relay in each pair. The high-capacity relays have current sensing.



Ratings

- Control relays: 1 HP at 120 VAC; 2 HP at 230 VAC
- Pilot relays: 230 VAC coil, 70 VA inrush, pilot duty

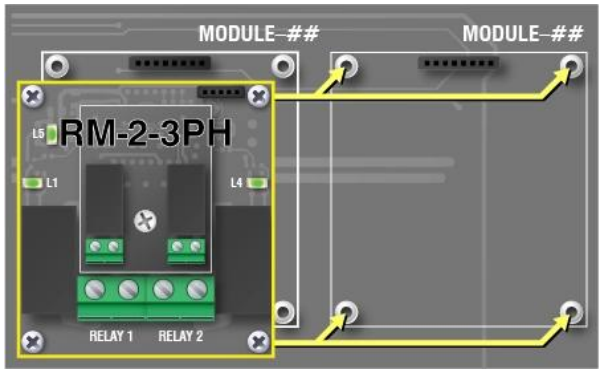
Before servicing the control or installing the module, switch OFF the incoming power at the source.

NOTE

If you are replacing an existing module, label all wires and cables before disconnecting them and removing the module.

Installation

You can install the module in any position **not marked** as “Extra Low Voltage Only”.



1. Position the module over the connector (A) and then press straight on to the connector.
2. Fasten the module in place using **all four** screws (B) provided.
