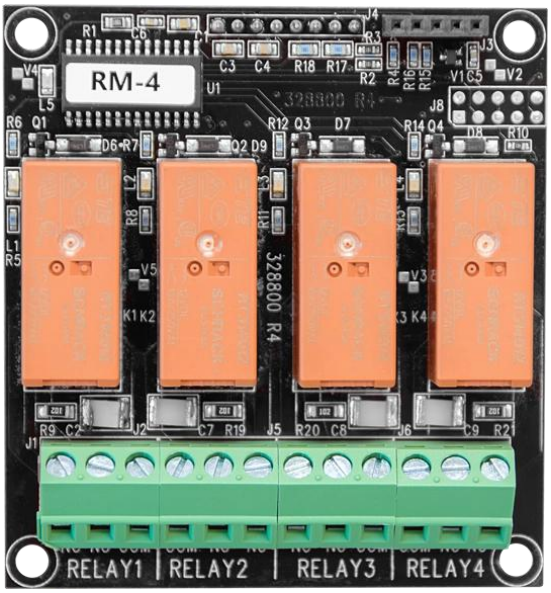
RM-4

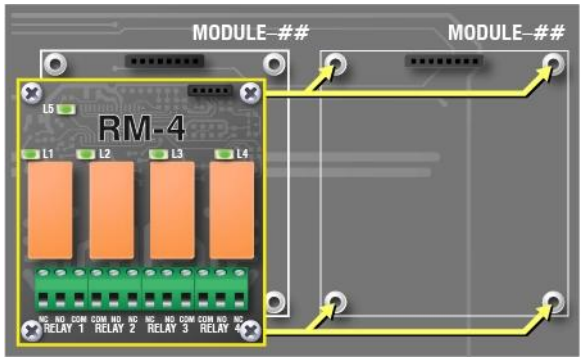
Relay Module

The RM-4 is a Smart Module that has four relays to control fans, heaters, lights, and other equipment. The RM-4 features a built-in microprocessor that precisely controls equipment.



Installation

You can install the module in any position **not marked** as “Extra Low Voltage Only”.



1. Position the module over the connector (A) and then press straight on to the connector.
2. Fasten the module in place using **all four screws** (B) provided.

Ratings

- 15 A at 120/230 VAC, general-purpose (resistive);
- 1/2 HP at 120 VAC; 1 HP at 230 VAC

Before servicing the control or installing the module, switch OFF the incoming power at the source.

NOTE

If you are replacing an existing module, label all wires and cables before disconnecting them and removing the module.
